

TRC Conference Call Meeting Notes

October 23, 2017

- 1 RMP Stakeholder Advisory Group Legislative Report
Scott Ambler reviewed recommendations of the SAG included in the submitted legislative report. The report is posted on the RMP website <http://www.dcr.virginia.gov/soil-and-water/rmp>
- 2 Questions and Comments
 - a. How long is an RMP (plan) valid?
Depends – The NMP portion of the RMP must be current. If the WIP or TMDL requirements change before a plan is certified, the RMP is no longer valid.
 - b. Will a conservation plan “notify” the RMP developer of new practices included in a CP?
The RMP developer can see all practices already included for those land units for which an RMP is being developed. The CP can be related to an RMP, even after the RMP is developed, but it will not send any notice to the RMP developer.
 - c. How does the certification process begin?
An RMP developer will enter a certification inspection into the module. The module will notify the District by e-mail that the RMP is awaiting the District’s certification inspection.

Reminder: The RMP developer should have completed an NMP verification form and 2nd part of the participant signature page prior to submitting the certification inspection.

Attending

Area I: Dana Gochenour

Area II: Claire Hilsen, Willie Woode, Luke Longanecker, Greg Wichelns

Area III: Keith Burgess, Brandon Dillistin, Danny Withers, Jim Wallace

Area IV:

Area V: Tricia Mays

Area VI: Meaghann Terrien

DCR: Scott Ambler, Roland Owens, Barbara McGarry, Amy Walker, Blair Gordon
